

**IMO Control Checklist for Forest Management (Generic Standard) World-wide, for countries without regional FSC-Standards.**  
**Requires adoption prior to use. Documents used for regional adoption:**

Type of Document	Document	Version
IMO documents	generic standard CH II 6-3-1	
Draft of regional standard		
Regional Standard other CB		
Advice notes, other FSC documents:		
Stakeholder comments		

Date of finalisation of regional standard:

**Please check the list of documents relevant for FM certification IMO CH II 6.a for updates and changes EVERY YEAR prior to the audit.**

**Regional indicators:** Whilst the adoption process, regional indicators are added to the checklist. The numbers are following the existing numbers and are indicated with an “R” at the end of the number for “regional”

**Group Certificates:** For each indicator it must be noted, if compliance is checked on Group or on Member’s level. The column “G/M” must be completed accordingly.

**SLIMF indicators** - if any exist - are listed as the first indicator of criterion. They are indicated with the no. of criterion and the letters SLIMF. The other indicators of the criterion do not apply for SLIMF companies.

**LPL – Large Plantations:** Plantations larger than 10.000 ha, indicators marked need to be controlled every audit (No. 2.3, 4.2, 4.4, 6.7,6.9, 10.6, 10.7, 10.8)

**LFM – Large Forest Management Units:** Non plantation forests larger than 50.000 ha, indicators marked need to be controlled every audit (No. 1.5, 2.3, 3.2, 4.2, 4.4, 5.6, 6.2, 6.3, 8.2, 9.4). For size classification the area of the individual operation or group member is relevant.

**HCV – High Conservation Values:** For companies where high conservation forests exist within the certified area these indicators need to be controlled every audit (No. 6.2, 6.3, 6.9, 9.4) - (see FSC-STD-20-007, section 6.3.8).

**Project classification:** Please indicate for each project which of the following criteria applies:

Project name: \_\_\_\_\_ date of audit: \_\_\_\_\_ Inspector(s): \_\_\_\_\_

Type:	Individual certificate or group?	
Size:	SLIMF – Large Plantation – Large Forest Management Unit?	
HCVF:	Does exist or not?	

**Please mark all indicators in the checklist which require an annual control with **grey colour** for the individual project according to this classification!**

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
<b>1.</b>	<b><u>COMPLIANCE WITH LAWS AND FSC PRINCIPLES:</u> Forest management shall respect all applicable laws of the country in which they occur, and international treaties and agreements to which the country is a signatory, and comply with all FSC Principles and Criteria.</b>				
<b>1.1</b>	<b>Forest management shall respect all national and local laws and administrative requirements.</b>				
1.1.1	The company being assessed proves to comply with the national and regional legislation and all its regulations.	policy statement		PC	
1.1.2	A register or summary of all pertinent legislation and regulations is available.	relevant legislation, regulations and their accessibility		C	
1.1.3	A person is responsible to ensure that copies of up-to-date legislation and regulations are accessible.	Diagram of responsibilities		C	
1.1.4	Employees and contractors are aware of the consequences of legislation and regulations for carrying out their work.	contracts, interviews with employees		C	
1.1.5	If violation of the law by company personnel is detected the management takes corrective measures and their implementation is documented.	documents regarding incidents		C	
<b>1.2</b>	<b>All applicable and legally prescribed fees, royalties, taxes and other charges shall be paid.</b>				
1.2.1	The enterprise has knowledge of all taxes, fees, royalties, and other charges that apply to its company.	lists of taxes according to legislation		PC	
1.2.2	There is proof of the settlement of all dues.	receipts, accountancy reports		PC	
1.2.3	Provisions are taken for the payment of taxes and other dues in the future.	budget, accountability		C	
<b>1.3</b>	<b>In signatory countries, the provisions of all binding international agreements such as CITES, ILO Conventions, ITTA, and Convention on Biological Diversity, shall be respected.</b>				

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
1.3.1	The requirements of relevant international agreements (CITES, ILO-Convention, Convention for biodiversity, Convention for climate, protocols from Helsinki are known.	copies of or access to text of agreements (signatory countries).		PC	
1.3.2	No agreements relevant for forestry are violated.	list of relevant agreements, check on sensitive issues.		PC	
1.3.3	Adherence to minimum age provisions of national labour laws and regulations, and of the international standards, no child labour. No work under the age of 18 when it is likely to jeopardize health, safety or morals (unless there special provision for safety, training or traditional community circumstances)	Interviews with workers and their labour organisations or unions, collective agreements, records of labour inspectorate.		PC	
1.3.4	Prohibition of forced labour: No workers in debt bondage or other forms of forced labour are engaged (incl. Employees, self-employed or contractors). Ref: ILO Conventions 28 & 105, ILO Declaration 1998, or equivalent national legislation.	Interviews with workers and their labour organizations or unions, records of labour inspectorate, labour contracts		PC	
<b>1.4</b>	<b>Conflicts between laws, regulations and the FSC Principles and Criteria shall be evaluated for the purposes of certification, on a case by case basis, by the certification body and the involved or affected parties.</b>				
1.4.1	Identified conflicts are documented.	cross reference P&C - legislation, specific documents		PC	
1.4.2	Authorities, involved and affected parties were consulted about the problem.	minutes, statements of the authorities, stakeholders		PC	
1.4.3	In case of existing conflicts between P&Cs and legislation the situation is at least explained and justified and/or propositions or other efforts for a solution are submitted by the certification body, if necessary. The national or regional FSC initiative is involved.	relevant documents, statement of authorities, proposition		C	
<b>1.5</b> LFM	<b>Forest management areas should be protected from illegal harvesting, settlement and other unauthorised activities.</b>				
1.5.1 LFM	The applicant is able to identify and monitor possible illegal activities.	control activities, demarcations of limits, surveys		PC	
1.5.2 LFM	Appropriate and competent human resources are available to prevent such activities.	diagram of responsibilities, schedules		PC	
1.5.3 LFM	Procedures exist and appropriate measures are taken against illegal activities.	procedures, documents regarding contact to authors and authorities, demarcations of limits, interviews		C	
<b>1.6</b>	<b>Forest managers shall demonstrate a long-term commitment to adhere to</b>				

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
	<b>the FSC Principles and Criteria.</b>				
1.6.1	The applicant has knowledge of the current version of the Principles and Criteria of the FSC International.	P&C at hand		PC	
1.6.2	The applicant has a stewardship policy, which complies with the FSC Principles and Criteria.	policy statement, stewardship policy		C	
1.6.3	The policy is communicated within the enterprise and to contractors	system of internal and external communication		C	
1.6.4	The policy is evaluated and revised periodically.	date on policy statement, policy for revision		C	
1.6.5	Information is disclosed on all forest areas over which the FMO has some degree of management responsibility (as per FSC policies, e.g. "partial certification").	maps, land register (German: Grundbuch; Flächenbuch)		C	
1.6.6	If the exclusion of certain areas is foreseen all relevant FSC policies (e.g. partial certification; POL-20-002) are considered.	Management responsibilities, ownership, range of influence		C	
1.6.7	If the forest manager is not the owner but holds a use right only, this use right must be a long-term use right. In case of doubt if the length of the use right is sufficient the forest owner must be included into the certification contract. (DIR-20-007 -> ADV-20-007-03)			C	
1.6.8	Any use of the trademarks (logo and initials "FSC") is approved by IMO before publishing.			C	
<b>2.</b>	<b>TENURE AND USE RIGHTS AND RESPONSIBILITIES: Long-term tenure and use rights to the land and forest resources shall be clearly defined, documented and legally established.</b>				
	NOTE: For regional adoption of the generic standard, GUI-30-004 concerning principles 2+3 shall be considered.				
<b>2.1</b>	<b>Clear evidence of long-term forest use rights to the land (e.g. land title, customary rights, or lease agreements) shall be demonstrated.</b>				
2.1.1	Documents indicating ownership of land and forest and defining long-term use and management of its resources are available.	legal title, deeds, contracts		PC	
<b>2.2</b>	<b>Local communities with legal or customary tenure or use rights shall maintain control, to the extent necessary to protect their rights or resources, over forest operations unless they delegate control with free and informed consent to other agencies.</b>				
2.2.1	The local residents or other people have written or customary rights regarding property and use of the forest are known.	register of legal titles and customary rights		PC	
2.2.2	Customary and legal rights regarding property, use and management of land,	written agreements, con-		C	

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
	territories and resources are documented. In case of use rights with negative long-term effect on resources sustainable solutions are sought.	tracts; assessment of long-term effects, proposals for solutions, minutes of negotiations, etc.			
2.2.3	Planned activities which could possibly affect customary and legal rights and use of resources are detected in advance.	check on management plan and customary activities of population; list of potential conflicts.		PC	
2.2.4	People entitled to those rights are aware of ongoing and planned forestry activities which could affect their rights.	public relation policy, documents, publications, <b>interviews</b>		PC	
<b>2.3</b> LPL, LFM	<b>Appropriate mechanisms shall be employed to resolve disputes over tenure claims and use rights. The circumstances and status of any outstanding disputes will be explicitly considered in the certification evaluation. Disputes of substantial magnitude involving a significant number of interests will normally disqualify an company from being certified.</b>				
2.3.1 LPL, LFM	Records describing any conflict, in the past or present, regarding property rights and usufruct (use rights) are available.	records		C	
2.3.2 LPL, LFM	Appropriate mechanisms for the solution of conflicts were developed, including legal and internal procedures. If indigenous peoples are affected, this is considered within the dispute resolution mechanism.	instructions		C	
2.3.3 LPL, LFM	There are no conflicts of large scale, involving a big number of affected people or concerning large areas. In the case of existing conflicts on a small scale a strong commitment towards a solution of the conflict is demonstrated.	interviews with affected people, minutes of negotiations, letters, media's, etc.		PC	
<b>3.</b>	<b><u>INDIGENOUS PEOPLES' RIGHTS:</u> The legal and customary rights of indigenous peoples to own, use and manage their lands, territories, and resources shall be recognised and respected.</b>				
	NOTE: For regional adoption of the generic standard, GUI-30-004 concerning principles 2+3 shall be considered.				
<b>3.1</b>	<b>Indigenous peoples shall control forest management on their lands (which are not their property) and territories unless they delegate control with free and informed consent to other agencies.</b>				
3.1.1	The applicant is aware of indigenous people living within its sphere of action and knows their locations and way of living, especially regarding their estab-	surveys, documentation on indigenous people and of		PC	

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
	lished customary rights to use the forest which is not the property of these peoples.	contacts with them			
3.1.2	Limits (geographical or regarding the type of using) are defined together with the affected people.	general policy, records of negotiations; <b>interviews</b>		PC	
3.1.3	The applicant is in permanent communication with indigenous people living in the area. Especially the procedures to inform about management activities is defined. This task is assigned to a specific employee.	general policy, work planning, minutes, diagram of responsibilities; <b>interviews</b>		PC	
3.1.4	The rights to control and manage their forest is granted for indigenous people. Delegation of the management of the forest to the applicant by indigenous people is documented in writing. There is proof that the indigenous people are not subject to any pressure of any kind.	written agreement, documentation of negotiation procedures (e.g. who took the initiative?), minutes; <b>interviews</b>		PC	
<b>3.2 LFM</b>	<b>Forest management shall not threaten or diminish, either directly or indirectly, the resources or tenure rights of indigenous peoples.</b>				
3.2.1 LFM	The applicant has knowledge of the resources used by indigenous people and the location of indigenous areas outside his management area.	surveys,. <b>interviews</b>		PC	
3.2.2 LFM	Traditional access for subsistence uses and traditional activities is granted as long as it does not threaten the integrity of the resources or the management objective.	hearings and documentation hereof, proof of oral communication. <b>interviews</b>		C	
3.2.3 LFM	All Management activities are evaluated if they might threaten or diminish the resources or tenure rights of indigenous peoples. If there is any risk they are modified Special attention is paid to situations with a potential for conflicts (e.g. overlapping of timber harvest areas with areas of collection of non-timber products, intensive exploitation of products).	notes in surveys, minutes/records of meetings, etc. <b>interviews</b> , management plan		C	
3.2.4 LFM	The indigenous peoples rights are communicated within the applicant's company and to contractors. All relevant activities are monitored closely.	policy and practice of internal communication, responsibility for monitoring (diagram of responsibilities)		C	
See also	4.1.4 Local residents are provided in an appropriate way with information and knowledge about the management of forests. 4.4.3 Possible social effects (positive or negative) of novel forest activities are surveyed. 4.4.4 Results of such surveys are taken into consideration during the planning process and for conflicts solutions are sought. 4.4.5 The applicant proves to make public consultation an integrated part of the planning process, unless this has already taken place or is planned on a regional scale. The public consultation is documented in an appro-				

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
	priate way.				
<b>3.3</b>	<b>Sites of special cultural, ecological, economic or religious significance to indigenous peoples shall be clearly identified in co-operation with such peoples, and recognised and protected by forest managers.</b>				
3.3.1	Sites of special significance to indigenous peoples are known and listed. The identification and definition of these sites is done in co-operation with the affected peoples.	inventory with maps, authors of survey, stakeholder consultation, <b>field</b>		PC	
3.3.2	Employees and contractors are informed on locations of sites of special significance. These sites are protected during forest operations and closely monitored.	policy and practice of internal communication, responsibility for monitoring (diagram of responsibilities)		C	
3.3.3	The indigenous people have access to their sites of special significance at any time. Temporary limitations of access (e.g. for safety reasons) are discussed with the affected people and carried out only with their agreement.	Instructions, consultation with affected people; <b>field, interviews</b>		PC	
<b>3.4</b>	<b>Indigenous peoples shall be compensated for the application of their traditional knowledge regarding the use of forest species or management systems in forest operations. This compensation shall be formally agreed upon with their free and informed consent before forest operations commence.</b>				
3.4.1	The applicant has documented which knowledge relevant to forestry was acquired from indigenous people, including the economic advantages thereof.	surveys, documentation / calculations, <b>interviews</b>		C	
3.4.2	Extent and type of compensation are agreed by both parties and in writing.	contracts		C	
3.4.3	Compensations are settled before activities start. (including activities before application for certification)	receipts or equivalent documents, work records		PC	
<b>4.</b>	<b><u>COMMUNITY RELATIONS AND WORKER'S RIGHTS:</u> Forest management operations shall maintain or enhance the long-term social and economic well-being of forest workers and local communities.</b>				
<b>4.1</b>	<b>The communities within, or adjacent to the forest management area should be given opportunities for employment, training, and other services. (social aspects see 4.4)</b>				
4.1.1	At least one employee is responsible for the contact to local people and acceptance of their concerns.	diagram of responsibilities		C	
4.1.2	Local people are given preference for employment if they meet the requirements.	personnel policy, list of personnel		C	
4.1.3	Criteria for awarding work to contractors are not only the price, but also qualifications, quality and the place of origin of the contractor and its workers.	list of contractors, selection criteria		C	

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
4.1.4	Local residents are provided in an appropriate way with information and knowledge about the management of forests.	hearings and documentation hereof, brochures,		C	
4.1.5	The company is committed to include the forest owners in their efforts of training and public information.	policies regarding education and in-house training, educational materials, number of training and attendees, letters, records, invitations		C	
<b>4.2</b> LPL, LFM	<b>Forest management should meet or exceed all applicable laws and/or regulations covering health and safety of employees and their families.</b>				
4.2.1 LPL, LFM	Up-to-date instructions regarding safety and health of workers exist and are applied.	instructions, safety equipment and its condition, <b>field</b>		PC	
4.2.2 LPL, LFM	The implementation of safety and health regulations is continually controlled.	diagram of responsibilities, record keeping of responsible person		C	
4.2.3 LPL, LFM	Dangerous areas in frequently visited forests are visibly marked.	criteria for marking danger areas, <b>field</b>		C	
4.2.4 LPL, LFM	Equipment and machines are periodically checked and maintained in safe working condition. There is proof of passed inspections and examination as prescribed by law. (applies also to contractors and their equipment)	maintenance records, inspection records, condition of equipment		C	
4.2.5 LPL, LFM	Appropriate safety equipment for everyone is available in the workplace and is used. For chain saw operators, the following equipment is obligatory: Chain brake on the saw, safety pants, helmet, ear protectors, visor or eyeglasses and steel-toed boots.	safety equipment and its condition, list of personnel, <b>field</b>		PC	
4.2.6 LPL, LFM	It is a defined what a work accident is.	Law, executive order, industrial regulations, insurance, company documents		C	(E.g. oil industry: 10 minutes undesired interruption of work)
4.2.7 LPL, LFM	All work accidents are recorded and analysed. Measures to improve the safety situation are taken accordingly.	records, analysis, measures taken after accidents		C	
4.2.8 LPL, LFM	The company provides healthy conditions for workers living on the company's premises or in work camps. This refers especially to health care, clean water and the provision for other basic needs.	Space per worker or family, concept and logistics for provision, <b>field</b>		PC	

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
4.2.9 LPL, LFM	For work accidents, a procedure is defined and known by the workers. First aid kits and means of communication like mobile phones exist, addresses of first aid institutions are known, means of transportation are available.	Work instruction, safety concept, <b>field</b>		C	
<b>4.3</b>	<b>The rights of workers to organise and voluntarily negotiate with their employers shall be guaranteed as outlined in Conventions 87 and 98 of the International Labour Organisation (ILO).</b>				
4.3.1	The rights of workers according to national legislation and the ILO conventions are known. Especially national regulations concerning minimum wages for workers are available and implemented by the company. The rates and all social welfare benefits are fixed in the workers' contracts.	Legislation, workers' contracts, wages regulations available/accessible		PC	
4.3.2	The employees are free to organise and to negotiate with their employer.	existing workers organisations, or reasons for non existence, minutes of negotiations		PC	
4.3.3	An employee is appointed for communication with unions and other workers organisations. Minutes of meetings are kept.	diagram of responsibilities, Protocols, letters		C	
4.3.4	Requests and concerns of unions and other workers organisations are dealt with constructively and objectively.	minutes, records		PC	
<b>4.4</b> LPL, LFM	<b>Management planning and operations shall incorporate the results of evaluations of social impact. Consultations shall be maintained with people and groups (both men and women) directly affected by management operations. (see 3.3)</b>				
4.4.1 LPL, LFM	The applicant has knowledge of relevant local stakeholders and affected groups.	list		PC	
4.4.2 LPL, LFM	Discussions with stakeholders about their concerns, and measures to be taken are properly documented.	records, minutes, letters, media, stakeholder consultation		C	
4.4.3 LPL, LFM	Possible social effects (positive or negative) of novel forest activities are surveyed.	surveys beforehand/after		C	
4.4.4 LPL, LFM	Results of such surveys are taken into consideration during the planning process. For any conflict solutions are sought.	surveys, adaptations of planning, documentation regarding conflicts		C	
4.4.5 LPL, LFM	General service for the public like recreation and leisure activities are taken into account. Restricted access to certain areas or at a certain time are justified in writing.	documentation of activities, work records, list of services and planned activities		C	

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
4.5	<b>Appropriate mechanisms shall be employed for resolving grievances and for providing fair compensation in the case of loss or damage affecting the legal or customary rights, property, resources, or livelihoods of local peoples. Measures shall be taken to avoid such loss or damage.</b>				
4.5.1	A responsible contact person is nominated to deal with any claims concerning losses or damages. The name of this person and where and how it can be contacted must be published in the local forest offices.			C	
4.5.2	Written procedures how to avoid any loss or damages caused by forest management activities are implemented. Appropriate compensation is offered and every reasonable effort is made to resolve conflicts through consultation aiming at achieving agreement or consent.	written procedures, if applicable documentation of their use		C	
5.	<b><u>BENEFITS FROM THE FOREST:</u> Forest management operations shall encourage the efficient use of the forest's multiple products and services to ensure economic viability and a wide range of environmental and social benefits.</b>				
5.1	<b>Forest management should strive toward economic viability, while taking into account the full environmental, social, and economic costs of production, and ensuring the investments necessary to maintain the ecological productivity of the forest.</b>				
5.1.1	All costs of forest management including the cost of conservation and social activities are recorded and taken into account in present and future accounts.	accountability, budget		C	
5.1.2	The necessary investments to maintain the diverse services and the productivity of the forest are made.	accountability, budget		C	
5.1.3	A bookkeeping system is in place which allows to define different types of costs and analyse the costs.	accountancy system		C	
5.2	<b>Forest management and marketing operations should encourage the optimal use and local processing of the forest's diversity of products.</b>				
5.2.1	The applicant proves to take into account all possible functions of the forest.	surveys of forest functions, management plans, <b>field</b>		C	
5.2.2	Appropriate efforts are made to open new markets for wood and other forest products, and to promote their optimal use and local processing.	processing standard of sold products, customers, marketing, market surveys		C	
5.3	<b>Forest management should minimise waste associated with harvesting and on-site processing operations and avoid damage to other forest resources.</b>				
5.3.1	Garbage of harvest and processing shall be surveyed and minimised. Any kind of garbage (broken machinery, containers, saw chains, etc.) is col-	estimated volumes before and measured volume after		C	

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
	lected and disposed off outside the forest.	harvest <b>field</b>			
5.3.2	Sensitive areas like riparian zones or wetlands are marked and excluded from harvesting activities.	working instructions, <b>field</b>		C	
5.3.3	Felled timber of usable quality is removed from the forest before natural processes decrease quality; efficiency of timber usage is intended.	policy, contracts with buyers, <b>field</b>		C	
<b>5.4</b>	<b>Forest management should strive to strengthen and diversify the local economy, avoiding dependence on a single forest product.</b>				
5.4.1	The forest is managed for more than one single product, including timber and non-timber products.	management plans, products		C	
5.4.2	The harvest of non-timber products by the local population is promoted within the limits of legal regulations and sustainability.	list of non-timber products, percentages, quantities, who collects them, company policy		C	
5.4.3	The use of non-timber products by the local population shall not put the sustainable development of the forest ecosystem in danger.	surveys		C	
<b>5.5</b>	<b>Forest management operations shall recognise, maintain, and, where appropriate, enhance the value of forest services and resources such as watersheds and fisheries.</b>				
5.5.1	The management plan describes and takes into account all possible services of the forest, including those outside the area covered by forest (such as municipal watersheds, commercial and recreational fisheries or the supply of water to downstream fisheries, visual quality, contributions to regional biodiversity, recreation and tourism). A wide range of products is produced and marketed. If services are missing or could be enhanced, they are incorporated into the management.	surveys on forest services, list of relevant areas, maps, number of products		C	
5.5.2	Sensible areas are known and detectable on maps. They are integrated in the management plan.	surveys on forest services, list of relevant areas, maps, <b>field</b>		C	
<b>5.6</b> LFM	<b>The rate of harvest of forest products shall not exceed levels which can be permanently sustained.</b>				
5.6.1 LFM	Management plans are based on current calculation of the sustainable yield for timber and non-timber products.	annual cut, calculation of sustainable yield for non-timber products, management plan for all types of products		PC	
5.6.2	The calculation of the annual allowable cut is based on recognised methods	calculation method		PC	

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
LFM	and calculated for a long term planning period. Sufficient data is collected as basis for the calculation.				
5.6.3 LFM	Harvested quantities are measured and recorded accurately and set against the growth data.	harvest register, sales record		PC	
5.6.4 LFM	Sustainability is calculated for the entire company, not for individual single species. If changes in the species composition result in a changing harvesting volume per species over the years it must be evaluated, if these changes are adequately considered in the management plan (FSC-DIR-20-007 -> ADV-20-007-08).	Management plan		C	
<b>6.</b>	<b>ENVIRONMENTAL IMPACT: Forest management shall conserve biological diversity and its associated values, water resources, soils, and unique and fragile ecosystems and landscapes, and, by so doing, maintain the ecological functions and the integrity of the forest.</b>				
<b>6.1</b>	<b>Assessment of environmental impacts shall be completed - appropriate to the scale, intensity of forest management and the uniqueness of the affected resources - and adequately integrated into management systems. Assessments shall include landscape level considerations as well as the impacts of on-site processing facilities. Environmental impacts shall be assessed prior to commencement of site-disturbing operations.</b>				
6.1 SLIMF	Knowledge of the possible negative impacts of activities is shown and sought to minimise them.	management plan, maps, interviews, <b>field</b>		C	
6.1.1	Any site disturbing management activity performed is assessed for its environmental impact prior to the management. This applies only for activities which are not mentioned specifically in this standard (e.g. timber harvest, road construction, etc.).	list of activities, <b>field</b>		C	
6.1.2	If such surveys are carried out they are considering the following aspects: - flora, fauna and biodiversity - soil properties (physical and chemical) - quality and quantities of water resources - use and disposal of chemicals - inorganic waste - landscape considerations	surveys		C	
6.1.3	Effects of the forest management on the environment are integrated into the management plan.	surveys, management plans, instructions, <b>field</b>		C	
6.1.4	Large forest ecosystems (ca. ≥10.000 ha) consisting of undisturbed natural forests are mapped and defined as a separate forest type. For the identification of these large forest ecosystems the regional situation is	Maps, <b>field</b> regional maps, aerial photographs and satellite scenes		PC	

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
	relevant, not the property of the FMO. (A forest owner might be responsible even for an area much smaller, which still qualifies as large forest ecosystem due to forests adjacent to the own forest.)				
6.1.5	In order to define these large forest ecosystems, key criteria of viable populations of most if not all naturally occurring species in natural patterns of distribution and abundance exist.	Surveys, management plan		C	
6.1.6	The natural dynamics in the large forest ecosystems must be described prior to setting up a management plan. Management activities must consider these dynamics and avoid a negative impact.	Surveys, management plan, instructions		C	
<b>6.2</b> LFM, HCV	<b>Safeguards shall exist which protect rare, threatened and endangered species and their habitats (e.g. nesting and feeding areas). Conservation zones and protection areas shall be established, appropriate to the scale and intensity of forest management and the uniqueness of the affected resources. Inappropriate hunting, fishing, trapping and collecting shall be controlled.</b>				
6.2. SLIMF	Where information exists on rare, threatened and endangered species and their habitat, the FMO uses this information to map and protect these resources.			C	
6.2.1 LFM, HCV	The applicant has knowledge of the existence of threatened and endangered species and habitats according to international, national and regional decrees and inventories. They respect the relevant protection measures.	decrees, inventories, surveys, management plan, instructions		PC	
6.2.2 LFM, HCV	Information on locally or nationally rare, endangered or threatened species and their biology is available.	list of rare and endangered species, magazines, literature		PC	
6.2.3 LFM, HCV	Employees and contractors are taught about the existence and recognition of rare and endangered species.	in-house training scheme, educational materials, <b>field</b>		C	
6.2.4 LFM, HCV	Known occurrence of rare, endangered or threatened species is protected through adopted management, protection means are the first priority on such sites. Harvesting is only allowed, if damage can be excluded by appropriate measures e.g. reduced intensity, selective cutting, temporary or permanent cutting off of access to areas, etc.	work plans and instructions, <b>field</b>		PC	
6.2.5 LFM, HCV	The individual units of reservations with total protection representing typical forest associations or habitats shall be of a minimum area large enough to maintain viable populations of key species. Experts, literature and local conservation organisation are consulted.	Objectives of protection for the individual reservations, information about key species and their biology		C	
6.2.6 LFM,	Forest owner and hunters co-ordinate and agree on adequate hunting quotas for each ecosystem. Vital needs of indigenous and/or local residents are taken into	Assessments of game density, hunting quotas, agree-		C	

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
HCV	account.	ments with hunter, knowledge local residents' needs			
6.2.7 LFM, HCV	Appropriate measures are taken to avoid harmful and illegal hunting, fishing and collecting.	communication with population and hunters, monitoring system		PC	
<b>6.3</b>	<b>Ecological functions and values shall be maintained intact, enhanced, or restored, including:</b> <b>a) Forest regeneration and succession.</b> <b>b) Genetic, species, and ecosystem diversity.</b> <b>c) Natural cycles that affect the productivity of the forest ecosystem.</b>				
6.3.1 LFM, HCV	Information describing the existing and potential natural forest types and non-forest ecosystems and their present condition in the sphere of action of the applicant and/or adjacent areas is available.	surveys, literature		C	
6.3.2 LFM, HCV	The silviculture techniques and the size of harvest units and clear cuttings are adapted to the ecosystem. Limits of clear-cut sizes set by national working groups are considered.	silviculture concept, <b>field</b>		PC	
6.3.3 LFM, HCV	Natural regeneration on non-forest land is maintained. Clearing of such developing forests may be justified if the regeneration consists of exotic species or endangers valuable non-forest ecosystems. The decision and justification for the management approach shall be included into the management plan. (FSC-DIR-20-007 -> ADV-20-007-09)	silviculture concept, management plan, <b>field</b>		C	
6.3.4 LFM, HCV	If trees are planted site adapted species and provenances are used. Attention is paid to the genetic composition (e.g. diversity, quality) of the reproductive material.	register of plant sources, including provenance's, seed source and genetic information		C	
6.3.5 LFM, HCV	A concept addressing the issue of maintaining and promoting diversity (habitats, species, genetic, succession, natural regeneration, natural dynamics) within the entire company and within the process of forest management exists.	silviculture concept, <b>field</b> (e.g. pioneer species, shrubs, secondary species)		PC	
6.3.6 LFM, HCV	The concept includes the protection of non-forest ecosystems. The company refrains from draining or intensifying existing draining systems, afforestation of succession areas, irrigation of dry-land or other activities affecting non-forested ecosystems.	General policy, management and silviculture concept, <b>field</b>		PC	
6.3.7 LFM, HCV	At least a part of the dead trees, especially those of diameters > 30 cm, are not removed, except for safety reasons. The forest management defines internally a certain quantity of dead wood to be achieved as long term goal, based on documented research or local best management practice and stakeholder input,	silviculture concept, instructions, surveys, research papers, <b>field</b>		C	

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
	respectively.				
<b>6.4</b>	<b>Representative samples of existing ecosystems within the landscape shall be protected in their natural state and recorded on maps, appropriate to the scale and intensity of operations and the uniqueness of the affected resources.</b>				
6.4. SLIMF	Representative samples of ecosystems that are unique and not under protection by public or private agencies known to exist, are identified, documented and excluded from the harvest area. Such areas shall be mapped.	maps, concept for protected areas, management plans		C	
6.4.1	Representative areas of natural ecosystems are selected, recorded on maps and put under appropriate protection and/or management. These measures are discussed and co-ordinated with the stakeholders.	maps, concept for protected areas, specific management plans		C	
6.4.2	The individual units representing typical forest associations or habitats shall be of a minimum area large enough to maintain viable populations of key species. Experts, literature and local conservation organisation are consulted.	Management and protection concept, information about key species and their biology		C	
<b>6.5</b>	<b>Written guidelines shall be prepared and implemented to control erosion, protect water resources, minimise forest damage during harvesting, road construction and all other mechanical disturbances.</b>				
6.5.1	Specific guidelines to minimise damages by management are implemented. They cover all topics relevant for the company, e.g. road construction, harvesting with machines, the control of erosion and the protection of sensitive areas.	list of critical activities, specific instructions, guidelines, monitoring records		C	
6.5.2	Appropriate measures are taken to prevent forest fires.	risk assessment, concept for prevention, prevision for emergency		C	
6.5.3	The size of clear cuts is considering the danger of wind/water erosion for the open soil. Erosion especially on clear cut areas shall be minimised and monitored.	monitoring document		C	
6.5.4	Along streams and water courses buffer zones are maintained and demarcated in maps.. Water courses are only crossed by machines if precautionary means are implemented.	maps, <b>field</b>		C	
6.5.5	Any other sensitive areas are marked in maps and identifiable in the field. These areas are protected against any negative impacts.	maps, <b>field</b> , working instructions		C	
6.5.6	Soil damage and compaction whilst harvest or any other activity is minimised. Driving should be done mainly on skidding lines, the logging must be done according to a planned and systematic method.			RE C	
6.5.7	Other factors which influence the damage by harvesting (e.g. growth periods or climate aspects) are taken into account.	e.g. growth periods, rainy season, etc. for determina-		C

		tion of time of harvest, relevant surveys and investigations, <b>field</b>			
<b>6.6</b>	<b>Management systems shall promote the development and adoption of environmentally friendly non-chemical methods of pest management and strive to avoid the use of chemical pesticides. World Health Organisation Type 1A and 1B and chlorinated hydrocarbon pesticides; pesticides that are persistent, toxic or whose derivatives remain biologically active and accumulate in the food chain beyond their intended use; as well as any pesticides banned by international agreement, shall be prohibited. If chemicals are used, proper equipment and training shall be provided to minimise health and environmental risks.</b>				
	NOTE: If chemicals are used, several FSC documents apply: Pesticides Guidance (GUI-30-001), P. Policy (POL-30-001), Processing P. Derogations (PRO-01-004, v2-2), P. Derogations (GUI-30-001a-1), Checklist for Application Derogation (PRO-01-004a, v1-0).				
6.6.1	The applicant proves to restrain from use of any harmful substances according to international treaties (World Health Organisation Type 1A and 1B and chlorinated hydrocarbon pesticides) and national legislation.	receipts, accountability, <b>depot/store,</b>		PC	
6.6.2	The applicant proves to minimise the use of any synthetic pesticide and fertiliser, including in nurseries and timber landings and stock. If synthetic pesticides or fertilisers are currently used: a) Any application is accurately documented and monitored (type of substance, reason for application, date/time, quantity, concentration, etc.) and b) effectiveness and cost/effect calculation are recorded and c) a plan for the reduction of chemical input (e.g. through practices better suited to the natural conditions and/or the replacement of chemicals by ecologically sound methods and substances) exists.	silviculture concept, receipts, surveys, records, <b>depot/store, field</b>		C	
6.6.3	A plan describing procedures in exceptional situations like insect calamities, etc. must exist.	concept with definition of exceptional situations and list of potential calamities, specific records		C	
6.6.4	If chemicals are used, instructions and monitoring ensure that the application is performed or organised and observed by competent (i.e. licensed) personnel and that protective clothing is available and used.	personnel, education/training, protective clothing/equipment		PC	
6.6.5	If chemicals are used specific and accurate instructions ensure correct storage, mixing, application, and disposal of containers and remainder of chemicals.	specific instructions, store, disposal		PC	

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
6.6.6	If chemicals are used specific emergency procedures for accidents with chemicals exist. Chemicals are never applied over groundwater bodies, near any surface water and under bad climate conditions (like rain, wind).	emergency procedures, instruction, training		PC	
6.6.7	The restrictions for the use of chemicals apply also to third parties (e.g. in the case of sold timber stored in the forest).	note on sale contract		C	
<b>6.7</b> LPL	<b>Chemicals, containers, liquid and solid non-organic wastes including fuel and oil shall be disposed of in an environmentally appropriate manner at off-site locations.</b>				
6.7.1 LPL	The necessity for the use of environmentally dangerous substances is surveyed and alternatives are considered (e.g. type of chain oil for chainsaws).	concept to minimise waste (especially non-organic), disposal concept		C	
6.7.2 LPL	All waste like oils, tires, containers, etc. is collected at central locations and disposed off in the safest way in regard to the environment at official off-site locations. Waste related to harvesting: See Principle 5.3	waste disposal concept		PC	
6.7.3 LPL	Oil changes and tanking up machinery takes place only on appropriate places equipped with relevant protection.	installations, specific instructions		C	
6.7.4 LPL	A member of the staff is responsible to for the control of these measures.	name		C	
<b>6.8</b>	<b>Use of biological control agents shall be documented, minimised, monitored and strictly controlled in accordance with national laws and internationally accepted scientific protocols. Use of genetically modified organisms shall be prohibited.</b>				
	NOTE: For definitions and details see GMO Policy (POL-30-602)				
6.8.1	If biological control agents are used legal regulations and scientific studies concerning their use are acknowledged.	scientific studies, regulations, personnel (e.g. with special experience)		PC	
6.8.2	All use of biological control agents is documented and strictly controlled against these regulations.	special instructions, records		PC	
6.8.3	A concept how to minimise the biological control agents is established and implemented.	biological control minimising concept		C	
6.8.4	The applicant proves not to use any genetically modified organisms.	principle (general policy)		PC	
<b>6.9</b> LPL	<b>The use of exotic species shall be carefully controlled and actively monitored to avoid adverse ecological impacts.</b>				

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
6.9.1 LPL, HCV	The results of surveys and inventories show the percentages of area and volume occupied by exotic tree species <sup>1</sup> .	results of surveys and inventories, management plan, stand descriptions, <b>field</b>		C	
6.9.2 LPL, HCV	Exotic species are monitored, in particular where they form stands: Growth and growth dynamic, phytosanitary condition, natural regeneration, effects on flora and fauna. The surveys allow projections for the future development.	specific surveys and recorded observations, ecological studies and literature		C	
6.9.3 LPL, HCV	The management has analysed reasons for plantation and/or promotion of exotics and their natural regeneration. They are only maintained and/or promoted on suitable sites and only if they prove to be of superior performance (growth and quality) to local species and if a market for their products exist.	silviculture concept, reasons for species selection, test results, market analysis		C	
6.9.4 LPL, HCV	Exotic species are not introduced in rare or endangered forest ecosystems. Any unwelcome natural regeneration of exotic species in protected areas and native forest areas has to be removed.	results of surveys and inventories, management plan, stand descriptions, <b>field</b>		C	
<b>6.10</b>	<b>The conversion from natural forest into plantations or non-forest land is not allowed. Only possible exception: The following reasons are valid at the same time: a) Compared with the total area the area of the respective plantation is very small. b) High conservation value forests are not affected. c) The conversion ensures clear, substantial, additional, secure and long term advantages in the future for the entire FMU.</b>			PC	
6.10.1	The affected areas which are destroyed or converted are documented exactly and for a long term.	yearly results (German: „Vollzug“; harvested volume, cultural measures, etc.), reports, book keeping		PC	
6.10.2	If conversion is done prior to each case it is checked, if the situation is in line with the exemptions defined by FSC. The results of this survey is documented.	management plan, harvesting plans and maps		C	
6.10.3	Any conversion is indicated to IMO prior to the implementation in order to allow an evaluation if the FSC requirements were met.	documents		PC	
6.10.4	If conversion occurs, any measures are implemented to restore, conserve or manage natural forest or grasslands in surrounding or adjoining areas equal to or exceeding the area disturbed.	management plan, stand descriptions		C	

<sup>1</sup> Exotic tree species are introduced species or subspecies not native or endemic to the area in question and which were introduced by man, voluntarily or not, during the last 1000 years. See also annex I for central Europe.

		measures, <b>field</b>			
10.3.4	For formerly established management units which are not as diverse as required, a plan for the increase of diversity exists. Alternatively, a reason is given for non intervention until the end of the turnover for these units.	maps, plantation dates, specific plan		C	
<b>10.4</b>	<b>The selection of species for planting shall be based on their overall suitability for the site and their appropriateness to the management objectives. In order to enhance the conservation of biological diversity, native species are preferred before exotic species in the establishment of plantations and the restoration of degraded ecosystems. Exotic species, which shall be used only when their performance is greater than that of native species, shall be carefully monitored to detect unusual mortality, disease, or insect outbreaks and adverse ecological impacts.</b>				
10.4.1	The specific characteristics of the planted sites are known and documented.	maps on climates, soils, plant geography and associations, etc.		C	
10.4.2	The applicant has knowledge about the performance and potential of local species in plantations, and of their products on the market. Efforts to improve this knowledge are continuously made.	scientific literature, applicant's own research and tests.		C	
10.4.3	Species are selected carefully and solid justification for the choice is given based at least on the experience made under similar conditions (found in scientific literature) including research on wood and other qualities, adaptation and growth potential of the species.	reasoning in management plan, scientific literature consulted, research and tests performed.		C	
10.4.4	Native species are preferred before exotic species. Exotic species are only used if their performance is greater.	management plan		C	
10.4.5	If exotic species are used their selection is analysed with particular care, giving additional information on products to be produced, productivity, expected prices, demand and possible ecological and social side effects.	reasoning in management plan, scientific literature consulted, research and tests performed.		C	
10.4.6	Within the company only seed and seedlings of known provenance and genetic quality are used.	register of used seed and seedlings		C	
10.4.7	Appropriate attention is paid to the issues of genetic diversity. Criteria for the use of genetically specialised or diverse seeds are established.	register for each management unit (provenance, seed source, parent trees), management plan		C	
10.4.8	All species and provenances, in particular exotic and/or genetically specialised seeds, are only used on a large scale if justified by the objective of the plantation and if the used provenance has been tested successfully. The production	results of provenance test, etc., reasoning in records for species/provenance selec-		C

	of locally adapted seed is promoted. See also 10.6.	tion.			
<b>10.5</b>	<b>A proportion of the overall forest management area, appropriate to the scale of the plantation and to be determined in regional standards, shall be managed so as to restore the site to a natural forest cover.</b>				
10.5 SLIMF	Plantation design and management enhances ecological values, especially around conservation features.	management plans, specific concept		C	
10.5.1	A concept for rehabilitation and management of (near) natural forest (as part of the plantation company) exists.	management plans, specific concept		C	
10.5.2	A minimum of (...) % <sup>2</sup> of the planted area is set aside for rehabilitation of (near) natural forest. Attention is paid to the appropriate size and spatial distribution (e.g. connecting corridors) of areas under rehabilitation, and to represent the different natural forest types of the area in question. The individual units of rehabilitation areas shall be of a minimum area large enough to maintain viable populations of key species. Experts, literature and local conservation organisation are consulted.	management plans, specific concept (especially criteria for selection of sites), maps		C	
10.5.3	Interventions in and development of the areas under rehabilitation are documented. The areas are mapped and delimited.	records, maps, <b>field</b>		C	
<b>10.6</b> LPL	<b>Measures shall be taken to maintain or improve soil structure, fertility, and biological activity. The techniques and rate of harvesting, road and trail construction and maintenance, and the choice of species shall not result in long term soil degradation or adverse impacts on water quality, quantity or substantial deviation from stream course drainage patterns.</b>				See 5.3 +6.5
10.6.1 LPL	Soil structure, fertility, and biological activity are improved. The techniques and rate of harvesting, road and trail construction and maintenance, and the choice of species do not result in soil or water degradation or substantial deviation from stream course drainage patterns.			C	
<b>10.7</b> LPL	<b>Measures shall be taken to prevent and minimise outbreaks of pests, diseases, fire and invasive plant introductions. Integrated pest management shall form an essential part of the management plan, with primary reliance on prevention and biological control methods rather than chemical pesticides and fertilisers. Plantation management should make every effort to move away from chemical pesticides and fertilisers, including their use in nurseries. The use of chemicals is also covered by criteria 6.6 and 6.7.</b>				See 6.6 and 6.7

<sup>2</sup> (...) stands for quantitative indicators which are specified before the assessment in national or regional standards by IMO personnel. See also paragraph 0.2 of this document.

10.7.1 LPL	Measures are taken against pests, diseases, fire and invasive plant introductions. Prevention and biological control are preferred before chemical pesticides and fertilisers including nurseries.			C	
<b>10.8</b> LPL	<b>Appropriate to the scale and diversity of the company, monitoring of plantations shall include regular assessment of potential on-site and off-site ecological and social impacts, (e.g. natural regeneration, effects on water resources and soil fertility, and impacts on local welfare and social well-being), in addition to those elements addressed in principles 8, 6 and 4. No species should be planted on a large scale until local trials and/or experience have shown that they are ecologically well-adapted to the site, are not invasive, and do not have significant negative ecological impacts on other ecosystems. Special attention will be paid to social issues of land acquisition for plantations, especially the protection of local rights of ownership, use or access.</b>				See 8.2 and P4
10.8.1 LPL	Negative environmental or social impacts are documented and designed. Measures to address the impacts are implemented.	see above		C	
<b>10.9</b>	<b>Plantations established in areas converted from natural forests after November 1994 <i>normally</i> shall not qualify for certification. Certification may be allowed in circumstances where sufficient evidence is submitted to the certification body that the manager/owner is not responsible directly or indirectly of such conversion.</b>				
10.9.1	The plantation does not occupy land converted from natural forest since November 1994, unless evidence exists that the current manager/owner was not responsible.	history and date of plantation, purchase contracts, land register (German: Grundbuch; Flächenbuch); fragments of old vegetation in the <b>field</b>		PC	
10.9.2	Primary, degraded primary and mature secondary forests, and threatened or endangered ecosystems were not be cleared or converted by current forest managers to create tree plantations.	history and date of plantation, purchase contracts, land register (German: Grundbuch; Flächenbuch); fragments of old vegetation in the <b>field</b>		PC	
10.9.3	Where conversions after November 1994 have occurred, steps are taken that convincingly compensate for such conversions. The same area must be restored to natural forests with the original species composition within the region.	See above plus management plan compared to field		PC	

No.	P&C Requirement	Sources of Verification	G/M	PC/C	Result
10.9.4	As soon as this restoration area was successfully established as forest the converted plantation can be included into the scope of the certificate and the timber harvested there can be sold as certified.	list of conversion area, list of restoration area, survey on success of restoration		PC
